Visitation is at the discretion of the facility and based upon the safety of all the patients.

Patients are identified by a security code. The patient is the only individual who can give out the security code. Only approved visitors, who have the security code, will be permitted to visit.

General Visitation Guidelines:

- Patients are not permitted outside food/drink, tobacco products, lighters, alcohol, drugs, weapons, or any other item considered unsafe by the facility.
- All items brought for the patient will be searched.
- Visitors may bring nothing with them to the visitation area. Visitors will be asked to secure personal items in their vehicle or available lock boxes. Only car keys will be maintained by the hospital during visitation. All visitors will be electronically scanned for metal.
- All visitors must be 18 years of age or older and be able to show photo identification. Exceptions to the age rule can only be made by the patient's physician and must be in writing.
- A maximum of two visitors are permitted per patient and may visit together or separately depending on space constraints during visitation.
